--------------	--------------------------------------

Attach a brief narrative to summarize the key information used to develop the rates including the main drivers for the revised rates.

This document is intended to help explain the rate filing and it is only a summary of the company’s request. It is not intended to describe or include all factors or information considered in the review process. For more detailed information, please refer to the complete filing.

Long-Term Care Insurance Rate Request Summary

Due to the claims experience, TPM Life Insurance Company finds a rate increase necessary. We are proposing a rate increase of 19% for policies issued before October 1, 2003. We are not requesting a rate increase for policies issued after October 1, 2003. The main driver for the revised rates is the claims experience. The company's long-term care ("LTC") pool of policies has deteriorated rapidly since in the last few years and this deterioration accelerated in 2013. Due to these adverse claims experience, a rate increase is necessary for the company and the long-term viability of its pool of LTC policies. While the number of new claims has increased, a key driver in the deteriorating experience is materially lower-than-expected claim terminations. That is, while some LTC claims will continue for years, many last a relatively short time period and the company's LTC premiums were determined assuming typical lengths on claim; however, the company has experienced materially longer lengths of claim.
