### **Summary of the Bureau of Insurance's review of the rate request:**

The Company originally requested a rate increase of 106% for this block of individual long-term care insurance policy forms. However, after discussion with the Bureau, the increase was reduced to 73.4%, to be implemented over 2 years.

The filing was reviewed by the Bureau's consulting actuary and determined to comply with the requirements for a rate increase set forth in 14VAC5-200-150 of the Virginia Administrative Code for policies issued before October 1, 2003. The review indicated that the anticipated loss ratio, reflecting claims payout, will be 96% with the increase, which exceeds the minimum required loss ratio.

The Company has advised that no further rate increases are anticipated, if the requested rate increase is implemented and the underlying assumptions, which reflect moderately adverse conditions, are realized.

The primary reasons for the rate increase are that policyholders are living longer and keeping their policies in force longer, which has resulted in more claims being filed than the Company anticipated when the policy was originally priced. The Company determined that a premium increase is necessary to reflect that future claims are expected to be significantly higher on these policies than originally expected or priced and to ensure that sufficient funds are available to pay claims.

The Company is offering all policyholders options to reduce the premium increase by reducing their coverage. These reductions could be in the form of lower daily benefits, a shorter benefit period, a longer elimination period, the termination of riders or any combination of these reductions, or a paid-up policy. Specific options are included in the letter sent to all policyholders notifying them of the rate increase and can be discussed with the Company by calling its customer service department.

The filing can be reviewed on the Bureau's webpage under the Rate/Policy Form Search at: <https://scc.virginia.gov/boi/SERFFInquiry/LtcFilings.aspx>
