**VIRGINIA ELECTRIC AND POWER COMPANY  
REPORT TO THE STATE CORPORATION COMMISSION OF VIRGINIA  
ON FUEL MIX AND EMISSIONS DATA FOR 2019**

Virginia Electric and Power Company (“Dominion Energy Virginia” or the “Company”) is an incumbent electric utility, as that term is used in the Virginia Electric Utility Restructuring Act, Va. Code §§ 56-576 to 56-596. Additionally, Dominion Energy Virginia is a local distribution company and, in 2019, was a provider of electricity supply service as defined by the Rules Governing Retail Access to Competitive Energy Services, 20 VAC 5-312-10 *et seq.*

By Final Order entered in Case No. PUE-2001-0013 on June 19, 2001, the State Corporation Commission of Virginia (“Commission”) adopted the Rules Governing Retail Access to Competitive Energy Services, 20 VAC 5-312-10 *et seq.* (the “Retail Access Rules”). On November 26, 2008, by Final Order in Case No. PUE-2008-00061, the Commission adopted revised Rules Governing Retail Access to Competitive Energy Services. Retail Access Rule 20 VAC 5-312-20(O) provides:

By March 31 of each year, the provider of electricity supply service shall report to its customers and file a report with the State Corporation Commission stating to the extent feasible, fuel mix and emissions data for the prior calendar year. If such data is unavailable, the provider of electricity supply service shall file a report with the State Corporation Commission stating why it is not feasible to submit any portion of such data.

Attached to this Report is a sample electric service bill showing the message that is appearing on the Company’s Virginia Jurisdictional customer bills.

The bill message provides information on Dominion Energy Virginia's mixture of fuels used to generate electricity during 2019. The information is provided by percentage of total generation for coal, nuclear, natural gas, purchased power, renewables, oil, and Bath/Hydro. In addition, the bill message provides the Company's 2019 emissions data, in tons per megawatt-hour generated, for sulfur dioxide and nitrogen oxide.
