Key Information Used to Develop the Rates Including the Main Drivers

“Our rates are based on assumptions regarding persistency (how long the policy stays in force), mortality (at what rate deaths occur), and voluntary lapses (when an insured voluntarily terminates his policy). Actual results are much higher than anticipated when the policy was originally priced which means that individuals are living longer and keeping their policies in force longer which results in more claims incurred. As a result, premiums must be adjusted to ensure current and future claims are adequately funded.”
