15. Starting in row 68, columns E and F provide instructions to interpret the results of the predominant test for the level of financial requirement/QLT. A cell in column F will auto-populate with “Predominant Level Met” at the level which passes the predominant test. For example, the image below shows the predominant level being met at the \$20.00 copay level.

PREDOMINANT TEST - 45 CFR 146.136 (c)(3)(i)(B): Predominant - If a type of financial requirement or quantitative treatment limitation applies to at least two-thirds of all medical/surgical benefits in a classification as determined under paragraph (c)(3)(i)(A) of this section, the level of the financial requirement or quantitative treatment limitation that is considered the predominant level of that type in a classification of benefits is the level that applies to more than one-half of medical/surgical benefits in that classification subject to the financial requirement or quantitative treatment limitation.
