**Subject:** New GATS Enhancement for VA RPS  
**Date:** Monday, December 15, 2014 9:58:49 AM  
**Importance:** High

---

PJM-EIS is pleased to announce a new enhancement in GATS. You are receiving this notice as we have updated a system within your GATS account.

- GATS has created and applied a Virginia certification number to 1) all generators in GATS that meet VA requirements for certification and 2) to any REC associated to those generators with a vintage year of 2014 or later.
- For RECs that reside in the VA utility accounts, the certification number was also applied to RECs with a vintage year between 2010 and 2013. These are the compliance periods covered by the VA RPS, and utilities are allowed to bank RECs from those past years for use in a future compliance period.
- Going forward, newly registered generators that are eligible in VA will have a unique VA certification number applied to the generator and to any RECs created for the compliance year in which the generator is approved.

Please contact us if you have any questions or concerns.

Sincerely,

*Gayle Dean*
